## PARQ (Procedure, Alternatives, Risks & Questions) conference

Procedure: DENERVATION — REINNERVATION of the larynx Anesthesia: General – no paralysis – EMG endotracheal tube Time: 4 hours
Alternatives: Botulinum toxin injections.
Risks: Anesthesia, Less than expected beneficial outcome, bleeding, infection, pain
Anesthesia The risk of anesthesia is uncommon but can be life-threatening.
Less than expected beneficial outcome Relief of effortful speaking and relief from spasms are the expected outcome. However, some patients may not have complete relief from their symptoms, and some patients may have a softer voice.
Bleeding Bleeding is a potential risk anytime a cut is made.
Infection Any time a skin incision is made, that becomes a route for bacteria to enter into the body.
Pain There may be moderate pain after surgery.
Students may be involved in observing or assisting with the procedures described above. Their name(s) is/are
Questions:  Dr. Thomas explained all of the above to me, I have had the opportunity to view the extensive explanation on the voicedoctor.net website. My questions have been answered to my satisfaction. I consent to the procedure.
